EXPERIENCE

A software developer currently focused on master data management, with hands-on experience in designing technical solutions that align with business processes, enhance data accuracy, and streamline workflows. Outside of corporate work, I build full-stack data collection applications to stay updated with current tech trends and industry practices.

Avensia Philippines Inc.

MDM Senior Developer —
2021 Mar - Present ; Cebu Business Park, Cebu City

- Maintain master data for various companies using the Syndigo platform (formerly Riversand)
- Translate business processes into technical solutions and providing strategic recommendations for improvement.
- Engage with clients to understand workflows and create functional and technical documentation.
- Design and implement data models, workflows, security measures, data integrations and data governance.
- Developed and optimized ETL pipelines that improved data accuracy.
- Designed and implemented internal tools to automate workflows and reduce manual tasks, improving efficiency and productivity

KYOCERA Document Solutions Development Philippines Inc.

Software Engineer II —
2016 Aug - 2021 Feb ; IT Park, Cebu City

- Implemented and maintained features under two proprietary architectures of KYOCERA (WC3, WC4) using C++, SQLite, JavaScript, JQuery, and Python.
- Performed automation and mock testing to improve the quality of our code using Jenkins.
- Managed the daily and weekly tasks during project development
- Mentored employees, ensuring comprehensive training in product and component knowledge
- Author and Co-author of 5 patent ideas, contributing to innovative software solutions.

Personal Projects & Open Source

2015 November - Present

- Designed, developed, and deployed frontend applications using React, Nextjs, TypeScript, and deployed on Vercel.
- Built and deployed backend APIs leveraging Node.js, Express, JavaScript, and MySQL, hosted on Heroku
- Designed and managed relational databases using MySQL and NoSQL databases like MongoDB.
- Maintains and updates personal portfolio at <https://tenghuey.dev/>
